

cdmNet. More than just a template

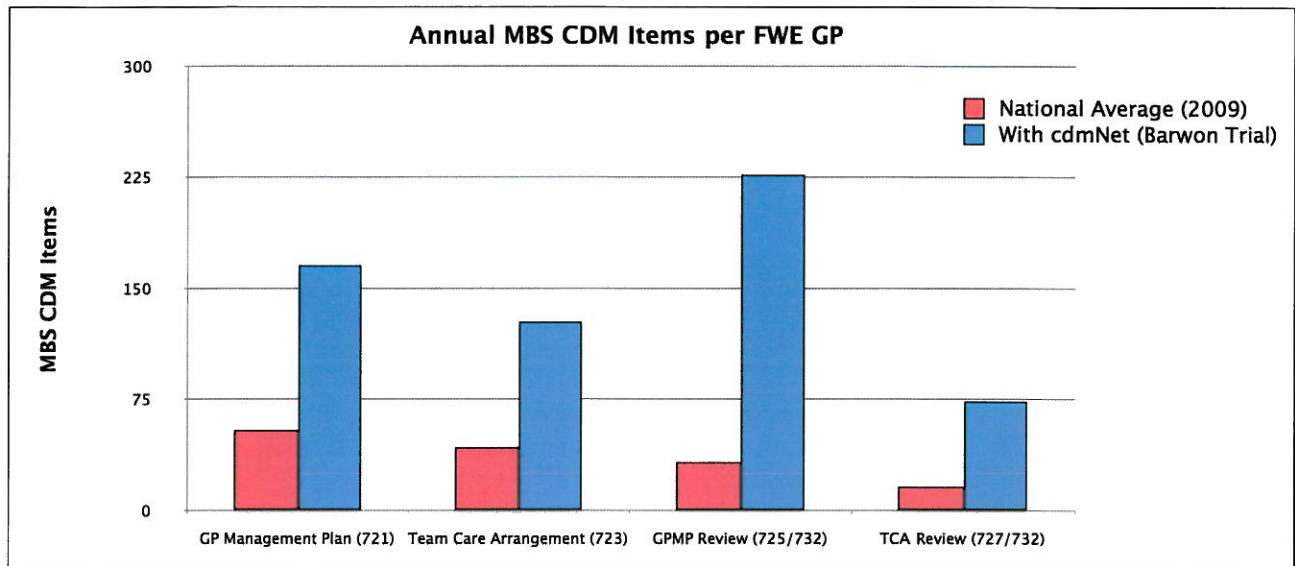

cdmNet allows you to instantaneously create GPMPs, distribute TCAs, coordinate your care team and easily monitor and review your patients.

Capability	Templates	cdmNet
Identifies chronically ill patients at point of care and alerts the GP of current status		✓
Automatically generates standardised best practice GP Management Plans (GPMPs), able to be manually customised	✓	✓
Automatically generates personalised best practice GPMPs, including comorbidities, without cut and paste		✓
Automatically coordinates sharing of Team Care Arrangements (TCAs), eliminating the need for faxing and scanning		✓
Automatically monitors patient progress, making it easy to review GPMPs and TCAs, and automatically complete Cycles of Care		✓
Automatically produces, distributes and stores all documentation, including GPMPs, TCAs, Allied Health Referral Forms, Home Medicines Review Referrals, GPMP and TCA Reviews		✓
Automatically alerts the GP and care team of upcoming or overdue tasks, including GPMP and TCA Reviews and Cycles of Care		✓
Ensures that all Medicare requirements are met		✓

“The beauty of cdmNet is that I don’t have to generate dozens of forms, it all happens automatically, and I don’t have to communicate with everyone separately”

~ Dr Arthur Pape, Bell Post Hill Medical Centre, Victoria.

cdmNet saves you time and increases revenues

cdmNet:

- ♦ Saves time: doubles practice productivity and eliminates the paperwork¹
- ♦ Increases revenues: regular users of cdmNet earn an additional \$40,000 per annum²
- ♦ Improves quality of care: better sharing of information, easier reviews¹
- ♦ Simplifies Medicare compliance: manages Medicare requirements and removes the overheads
